22 REASONS TO GO WITH 22MILES AGILE WORK-FLOW SOLUTION

22MILES DIGITAL SIGNAGE & WAYFINDING

WHY 22MILES? An array of endless possibilities begins with the limitless user experience of PublisherPro.AioT

22MILES simple to use CMS PublisherPro.AioT allows every user to become an instant expert at creating, importing, managing, and customizing immersive and engaging content. Transform ideas into outcomes, easily administer digital signage and interactive wayfinding projects that communicate, inform and impress.

1. Digital Signage Platform
22MILES award-winning CMS PublisherPro.AioT features unparalleled ease of use, granting users limitless connectivity as an integrated system communicating with other platforms. End-to-End functionality spanning live video chat, enterprise content control, and analytics put the full power of 22MILES most robust CMS for desktop and web, at your fingertips

2. Complete Content Management
From drag and drop widgets for project flexibility, to leveraging edge technology for native content triggering, 22MILES total content management platform grants users the power of agile software integration to cover digital signage, wayfinding,video walls, mobile apps, room booking, temp sensors, desktop solutions, and more.

3. Open API Automations
Automated integration with any open API & 3rd party data sources including XML,CSV, JSON, SQL, RSS, HTML, SOAP, ICS, LDAP, AD, SSO, Flight, Weather, Social Media, News and most others.

4. Interactive Wayfinding
The industry's most comprehensive 3D map editing suite for novices to experts. Easily stage through a simplified floor and room design module. Full control of pathway rules and content. 3D interactive wayfinding for kiosks and mobile. Additionally, users can customize their mobile app or integrate an open API into their apps.

5. PaaS (Protection-as-a-Service™)
A suite of integrated technology features created to address hygiene and agility within viral pandemics and the evolving safety measures of social distancing. PaaS features a growing number of options such as Touchless Touch voice and mobile controls, hoteling for maintenance sanitizing, TempDefend™ thermal screening, desktop notifications, access control integrations, virtual receptionist, and focused wayfinding for density controls.

6. TempDefend™
22Miles Proprietary thermal screening solution, Made in the USA. Keep staff, visitors, and the public safer with this customizable, "Plug-and-Play" digital signage communication and directions tool. TempDefend™ couples advanced camera hardware, facial and body temperature detection software, integrated sensors, and dynamic machine learning algorithms with Microsoft Surface, AOpen, ELO, and other displays.

7. Touchless Touch
A fully interactive, touch-free user experience using 22Miles' Voice Activation/Recognition & Control capabilities. Touchless Touch can be integrated into any kiosk or signage application to provide touch-free accessibility and wayfinding.

8. Live Triggered Alerts
Emergency alerts support with live triggering, integrations supported with RAVE, Alertus Everbridge, In

fromacast, & other Cap & RSS systems

9. Voice Activation & Control
Just speak and go! Create a fully interactive touch-free user experience through 22MILES' Voice Activation/Recognition & Control.

10. Digital Reader Boards
22MILES' digital reader board solutions help you communicate to visitors, customers, patients, & employees. Easily schedule your digital reader board to display any information desired.

11. DNS
A desktop digital notification screen saver and desktop widget designed to keep remote and distributed workforces aware and connected in real time.

12. Secure Mobile Control
Eliminates the hygiene risks associated with touching and physically interacting with screens. Operate any digital device using any OS with a QR code scan (network required) on a mobile device and power from a web browser, with no application to download or install.

13. Virtual Receptionist
22MILES proprietary video call web server system with a body temperature detection module for a safer front desk or lobby interaction with any visitors or delivery services. Integrations for check-in and badge printing capabilities.

14. Video Walls
Manage large scale digital displays just as seamlessly as with a single unit deployment. 22MILES video wall mapping supports the content design and deployment on dual-screen, multi-orientation, 4K+, and multi-touch video walls with a straightforward canvas and sectional layout editor and array controls.

15. Augmented Reality
Virtually expose the real world of finding destinations throughout any route with a super-imposed AR pathway solution through the user's phone camera with ARKit and ARCore plug-ins. Incorporate image recognition for live positioning and promotional capturing pop-up information through AR Landmarks and leverage the 22Miles machine learning to define and highlight your location as a stand-alone AR GPS solution for any large facility location.

16. Room Booking
Manage custom templates with unique features through the 22MILEs Book Flex solution. Highlight room occupancy and amenities, leverage active directory/SSO for the attendee integrations, auto cancellation, extend meeting or book now features, push/pull events from O365, Exchange, Google, Condeco, and EMS to any Brightsign OS, Android, or Crestron room booking tablet devices. Even drive content to the mobile devices of your attendees with 22MILES room booking mobile workplace app capabilities. Pairable with 22MILES interactive wayfinding hoteling/hotdesking.

17. Hoteling & Hotdesking
22Miles agile workplace capabilities support live & dynamic room and desk booking through 3D wayfinding with scheduling integration. Provide real-time highlights of reserved or available spaces, timed for maintenance, accessible per seat count or amenity, and AD/SSO positioning for all attendees. It can easily be managed through an iOS or Android corporate app by 22Miles as well.

18. Carry2Mobile™
Experience content on a mobile phone with no App download necessary. Carry2Mobile™ uses HTML5 technology to seamlessly transition the user experience from a digital sign to any mobile device's web browser through a QR Code. Great for guest rooms TVs such as Samsung or LG SOC systems, room booking tablets, retail promotional displays, and wayfinding kiosks.

19. Data & Engagement Analytics
Stay on top of how users engage with your layout buttons, keywords, impressions, icon clicks, devices, and technology. Explore and expand with real-time data analytics, integration with edge environments to deliver optimal outcomes, and enhanced triggered user experiences.

20. Work-Flow controls
Desktop and web management suite for improved user roles and approval workflows for day to day organizational content contributions and publishing rights. Granular control of players, users, channels, and rights by departments, locations, and more to adapt to your environment needs.

21. All-Markets Solution
22MILES technology solutions are built for flexibility and simplicity to serve multiple markets including, healthcare, hospitality, education, business, retail, airports, convention centers, government, smart cities & more.

22. Enthusiastic Customer Support
22MILES customer support team is always with you, partnering with your organization to achieve optimal results.
