

22Miles + Crestron

Crestron Electronics integrated with 22Miles workplace, and digital integrations provide customers with collaborative enterprise solutions.

22Miles Digital Signage System Paired with Crestron's Collaborative Enterprise Solutions Support Your Agile Work Environment with hotdesking & hoteling.

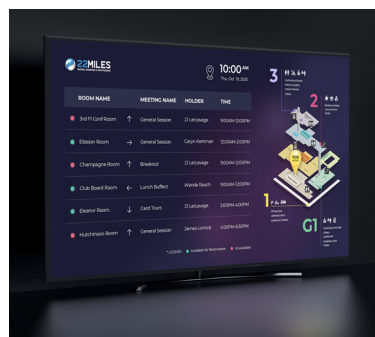

Reserve rooms with a feature-rich application that provides a personal experience for booking, check-in, schedule lookup, 3D map with highlighted hoteling, tech issue support messaging, plus more. 22Miles is natively supported on the Crestron TSS touch screens outside the room.

AirMedia Receiver - Automatically display 22Miles digital signage when Airmedia is not used for conference room presentations.

Desk Sign Devices - Hotdesking solution fully integrated to desk signs from calendars to mobile apps or 3D wayfinding touchscreens.

Visual Communication with space utilization dynamic integration design.

Manage your Crestron TSS panels template and device settings quickly and efficiently through the 22Miles content manager lite web dashboard.

Empower Employees
22Miles software tools and workplace integrations allow you to give employees multiple ways to view and book conference rooms.

Book Desk & Meeting Space
Create a touch-less touch experience with the 22Miles mobile app and Crestron occupancy motion sensor integration. Automate room check-in, enable occupancy-based booking and huddle space occupancy detection, and more.

Dynamic Wayfinding
Allows employees to be more agile in any large workplace and visually understand space availability and smart pathway, reducing the stresses of searching through a large floor plan.

Choose the solution that's right for you.

Work with one Platform designed to maximize workflow and create an immersive agile workplace.

1. Native Device Integration

22Miles natively supports Crestron Desk Signage, TSS Room Panel, AirMedia digital signage, Occupancy Sensors, RFID card readers.

2. Collaborative Mobile App

Incorporate 22Miles mobile solutions for the hybrid workplace to complement any Crestron workspace device for a seamlessly integrated real-time booking and planning experience on the go.

3. Built for API Integrations

Automations with read/write capabilities from O365, Exchange, G Suite scheduling, including access control systems, QR-Code/RFID check-in, alerts, Teams/We-Ex integrations, SSO/AD, IT reporting, and more from the desktop to mobile and integrated with Crestron devices.

4. Leverage Wayfinding

22Miles best-in-breed 3D Engine with hoteling and hotdesking features to create a visually dynamic routing to any live space booked on Crestron TSS touch, Desk Signage, activated by RFID, or triggered by occupancy sensors.

5. Custom UI Workflow

22Miles Book22 Plus suite provides custom design features to complement any organization's branding, widgets, and call to action features to meet department to individual-level needs.

6. Data-Driven Insights

Space utilization data insight dashboards promote workspace occupancy, employee safety, cleaning ready notifications, and office usability tracking results.

Why 22Miles?

We build partnerships that guide organizations to achieve their most ambitious outcomes.
