

Room Booking Solutions

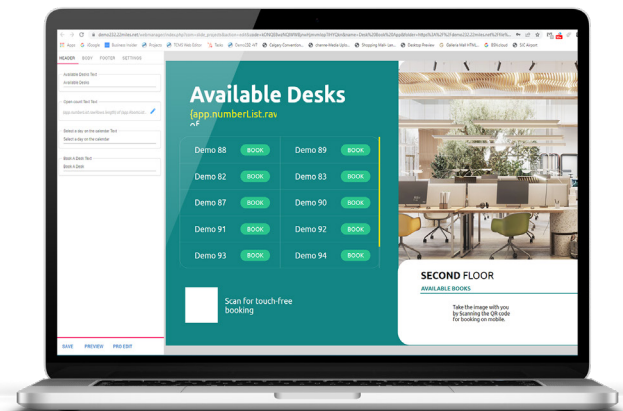

Challenges

Room and space booking in the workplace is a great way to get more out of your facility, but it comes with several challenges. The availability of rooms and spaces can be limited, especially during peak times when multiple events or meetings are happening simultaneously. Scheduling conflicts can arise, resulting in delays, rescheduling, or cancellations. Communication breakdowns can occur, leading to confusion and misunderstandings. Room and space booking software can be complicated or not integrated with other systems or tools, making it challenging to manage bookings. Another challenge is ensuring that resources, such as AV equipment, furniture, and catering services, are available in each room or space.

How 22Miles Solves Them

Managing flexible workspaces with 22Miles Publisher Pro is easy. Our CMS simplifies room and space booking reservations, automates availability calendars, and centralizes space and room reservation data for managers. Streamlining the space booking and reservation process lets employees focus on more critical tasks. Automating room booking can help enterprise businesses save time, increase productivity, optimize resource utilization, improve communication, and more. Integrating a robust CMS like ours can lead to cost savings and improved operational efficiency, making it a valuable tool for organizations of all sizes.

Room Booking Features

Integrate with Microsoft and Google and automatically sync with room signage for instant availability updates

Support nearly every type of SoC and IoT device, and operating system

Easily apply consistent branding across all screens

Streamline the space/room booking workflow down to a single click

Extend the meeting when the room is available

End meetings instantly to free up the space

Instant-read booking calendar in various formats viewable from every screen in the facility's digital ecosystem

Choose from professionally curated content layouts in our template center

Support an unlimited number of rooms without restrictions

Support multiple users for content management and system updates

Web designer interface for making layout customizations

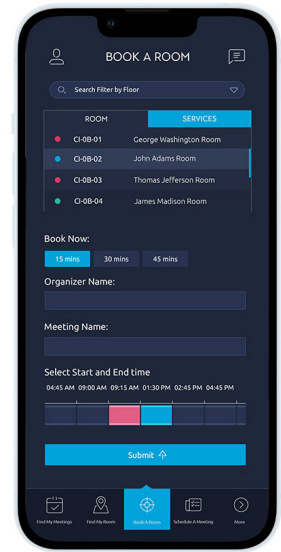

Display slideshows as a screen background, even in MTR idle screens

Book room or workspace from any screen, kiosk, tablet, or mobile device

Automatic check-in and out will cancel meetings if no one shows up

Display ticker or scrolling feeds from company social media, news, and more

Benefits of using 22Miles

Remove the hassles of manually managing the booking and scheduling of your meeting rooms, conference rooms, and collaborative office spaces with the 22Miles content management system (CMS). Intelligent automation does the work, so data feeds will update dynamically, enabling employees to get more done with less effort. Our software's tools and workplace integrations empower workers to locate, view, and reserve conference, huddle, or meeting rooms that are instantly updated. And it seamlessly operates with the software your team already uses and loves, such as Microsoft Office 365, Teams, Cisco WebEx, Zoom, and more.
